

Marmot · Varanus Therapeutics Demo Brief

Confidential. Internal Use Only.

Prospect: Varanus Therapeutics · Sales Engineer: Sunan Fatima · Account Executive: Jordan Silvers · Prepared: Monday, May 25, 2026

PROSPECT PROFILE	
Varanus Therapeutics · Series C biopharma · First commercial launch <i>185 N Franklin St, 4th Floor · Chicago, IL 60606 · The Loop</i>	
COMPANY SIZE ~140 employees \$310M Series C raised (Q1 2025) Clinical-stage to commercial transition	PIPELINE PRIORITY DR-2036 (lead asset) FDA approval expected Q3 2027 18 months to launch
ASSET PROFILE DR-2036, oral once-weekly GLP-1 Indication: Type 2 Diabetes First oral entrant in a market owned by injectables	MARKET POSITION Entering Ozempic / Mounjaro / Wegovy class All current competitors are injectables Wedge thesis: capture patients GLP-1s can't keep
DATA SCOPE Komodo Healthcare Map PLAID patient-level claims HCP/HCO provider profiles National Drug Projections (NDP)	STRATEGIC PRESSURE IDENTIFIED VIA Investor pressure on launch readiness Board demand for defensible market thesis Limited team. Needs leverage, not headcount. Value-based care ties outcomes to access

STAKEHOLDER	WHAT THEY CARE ABOUT	PAIN POINTS	WIN CONDITION
Tamara Brand Director	- Defensible market thesis for the board - Speed from question to strategy - Where to focus a small launch team	- Reports synthesize too slowly - Vendor decks don't survive board scrutiny - Can't see the wedge in the GLP-1 landscape	- Foundation built in minutes - Wedge framing: 35% / 38% / 2.1M - Talk track she carries to the board
Scott Sales Lead	- Where to deploy the first 12 reps - Territory-level access intelligence - Inheriting analysis without re-doing it	- Generic targeting wastes rep time - No view into access by geography - Sales planning runs weeks behind brand	- Mid-Atlantic wedge identified visually - Three toggleable map layers - Inherits Tamara's foundation
Chris Commercial Analyst	- Defensibility of every number cited - Audit trail for legal + medical affairs - No black-box AI outputs	- Black-box vendors burn his credibility - Methodology buried, can't be inspected - Re-runs take days when assumptions shift	- Execution graph: every node queryable - Drop-off SQL inspectable in one click - Answer methodology Qs in 3 seconds

KOMODO'S CORE PILLARS				
01 Grounded Every answer is rooted in the Komodo Healthcare Map: PLAID claims, HCP/HCO data, NDP projections.	02 Explainable Every step is materialized. Click any node, see the SQL, read the logic in plain language.	03 Reproducible Same inputs always yield the same outputs. Re-run, branch, or version any analysis.	04 Verified Multi-agent critique runs before execution. NDC codes checked, cohort logic reviewed.	05 Governed Every change tracked. Lineage preserved. v1.0 stays locked when v1.1 forks.

DEMO SEGMENT	WHAT MARMOT SHOWS THEM	DELIVERABLE	PILLARS ADDRESSED
Foundation analysis	- Click-driven 5-stage workflow: plan, critique, execute, validate, deliver - Each subtask shows which model ran it (Komodo KG, Gemini, Claude) 34 validation checks before any output ships	- Market snapshot: Ozempic 42% / Mounjaro 31% / Wegovy 18% share - Wedge framing: 35% discontinue · 38% denied · 2.1M never-started - Answers: "What's our defensible board thesis?"	● Grounded ● Verified
Territory strategy	- Auto-play workflow that inherits Foundation v1.0. No re-runs. - US territory map with 3 toggleable layers (density, denial, competitor) - Wedge zone emerges when all three layers stack	- Ranked territory table with composite wedge scores - Mid-Atlantic identified as #1 deployment zone (94 wedge score) - Rep deployment plan, ready Monday morning	● Grounded ● Reproducible
Execution graph	8-node mind map of every analytical step - Click any node to see its SQL, lineage, and data hash - Edit, materialize, or trace lineage on any node	- One click on the drop-off node reveals the SQL behind the 35% - Every number Tamara and Scott used, fully sourced - Answers: "Can I defend this in a methodology review?"	● Explainable ● Governed

DEMO PLAN	
Presented By	Sunan Fatima, SE (with Jordan Silvers, AE)
Demo Site	Custom Marmot environment, branded for Varanus Therapeutics (DR-2036 launch workspace)
Demo Flow	One plain-English question. Three answers, ready for each stakeholder: foundation, territory map, execution graph.
